Individual Machining Service

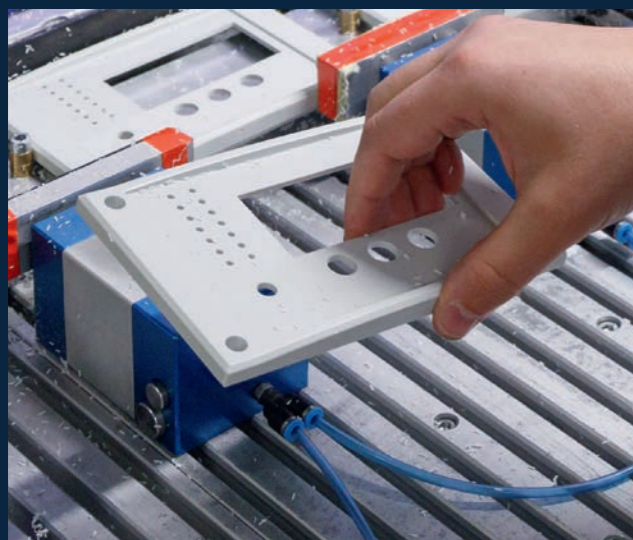

FIBOX CUSTOMIZING

INDIVIDUAL MACHINING SERVICE

We are driven by the desire to offer you a product that is in line with your vision. „One Fibox“ is our promise for maximum added value. As specialists in our field, we have the expertise to fully understand your requirements in order to offer you more than just an application solution.

With our individual machining service, we go far beyond our product portfolio and offer you customised solutions for all FIBOX enclosures.

The enclosures can be machined, painted or printed using state-of-the-art technology. The FIBOX mounting service allows you to shorten manufacturing processes and save costs.

Mechanical processing

Benefit from our numerous customisation options, such as drilling, milling or other mechanical processing, even for small quantities.

Tool modifications

Faster processes with the right tool? For our OEM enclosure series, we modify existing tools for standard enclosures as from certain quantities.

Painting & printing in special colours

In addition to the possibility of ordering enclosures in many colours of your choice, we also offer individual printing or painting according to your specifications according to the quantity.

✓ **EMC optimisation:** Depending on your requirements, we offer you various methods for EMC optimisation of your enclosure.

Mounting service

We carry out the mounting of all third-party and FIBOX accessories and deliver your enclosures pre-assembled and ready for connection.

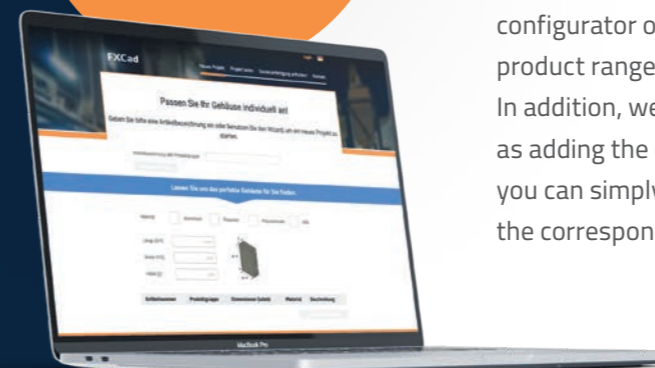

You are not sure which enclosure is suitable for you? Simply download the CAD data!

FX CAD – ENCLOSURE CONFIGURATOR

Easy online planning and directly request an individual quotation

FX CAD allows you to easily plan your individual enclosure in 3D. The configurator offers you a direct selection from the extensive FIBOX product range or a simplified search by enclosure sizes and materials. In addition, we offer you further various customisation options, such as adding the desired machining. After completing your registration, you can simply save your selection, request a quotation and download the corresponding CAD data.
